

Musculoskeletal System

&

Reproduction

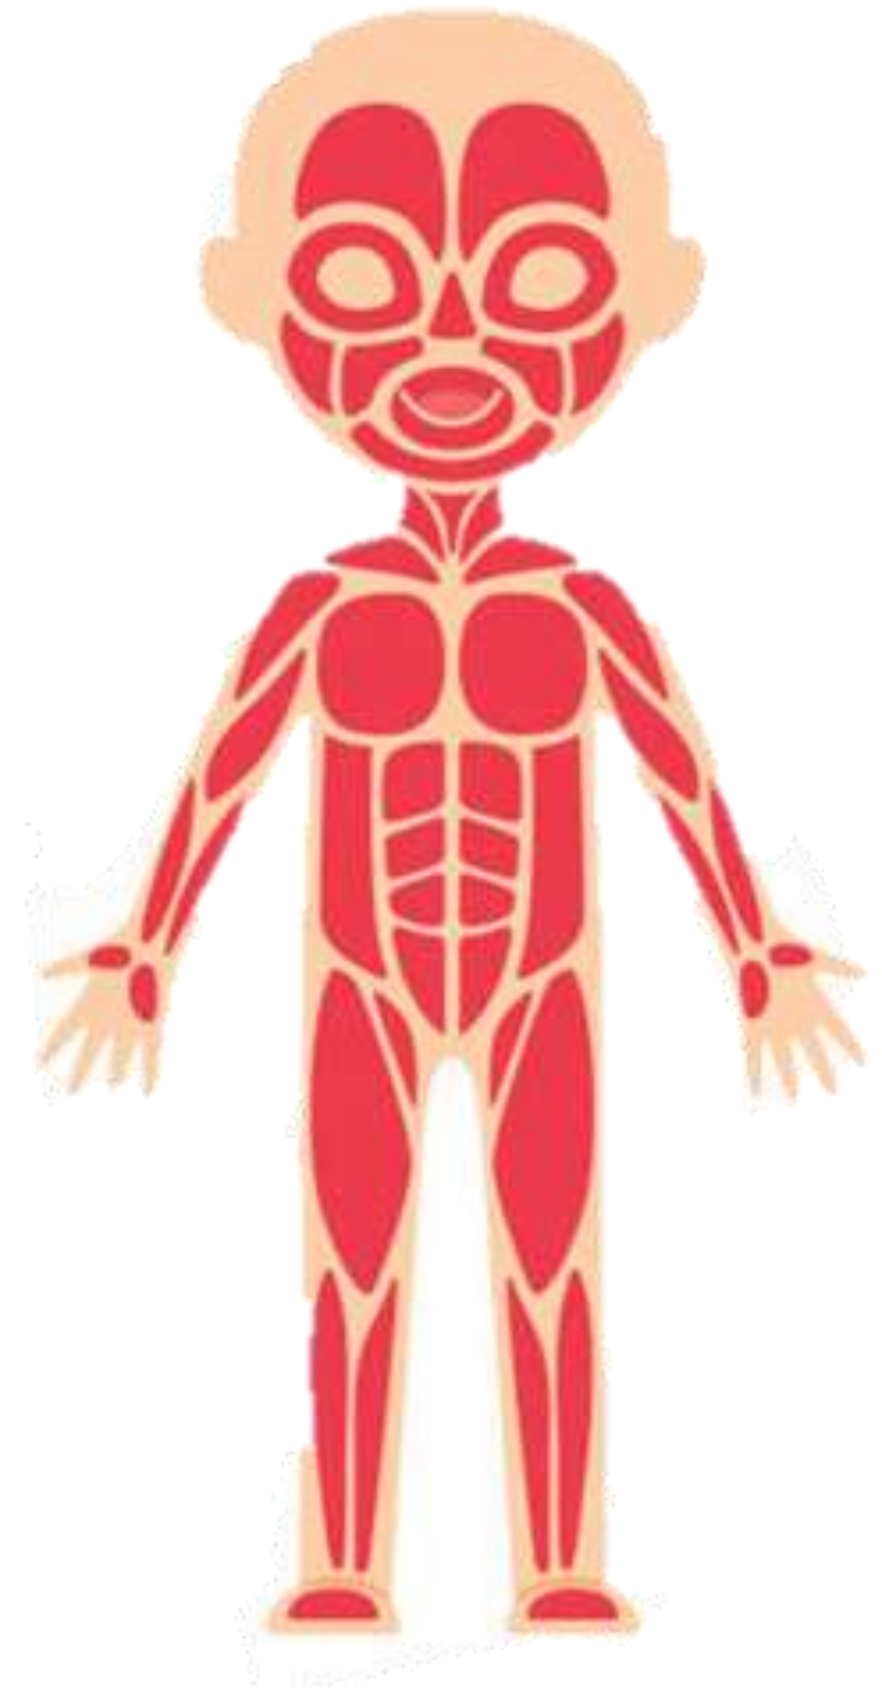

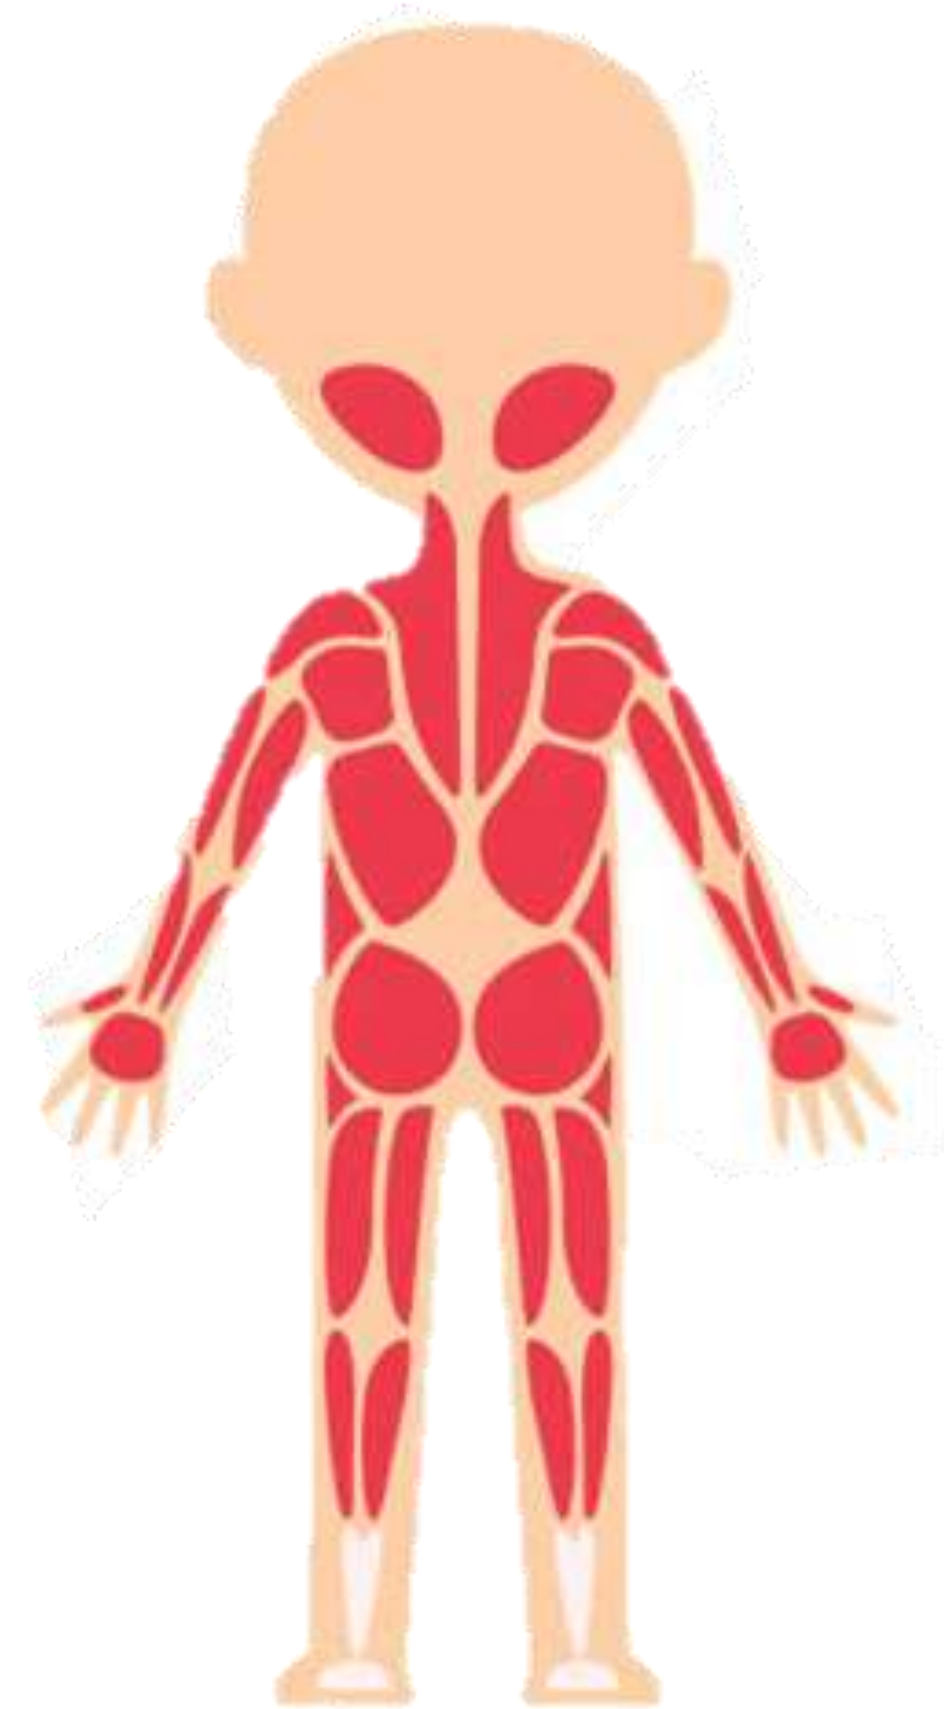

What is the musculoskeletal system?

- A system made up of bones and muscles
- It lets you move your body parts and go from one place to another

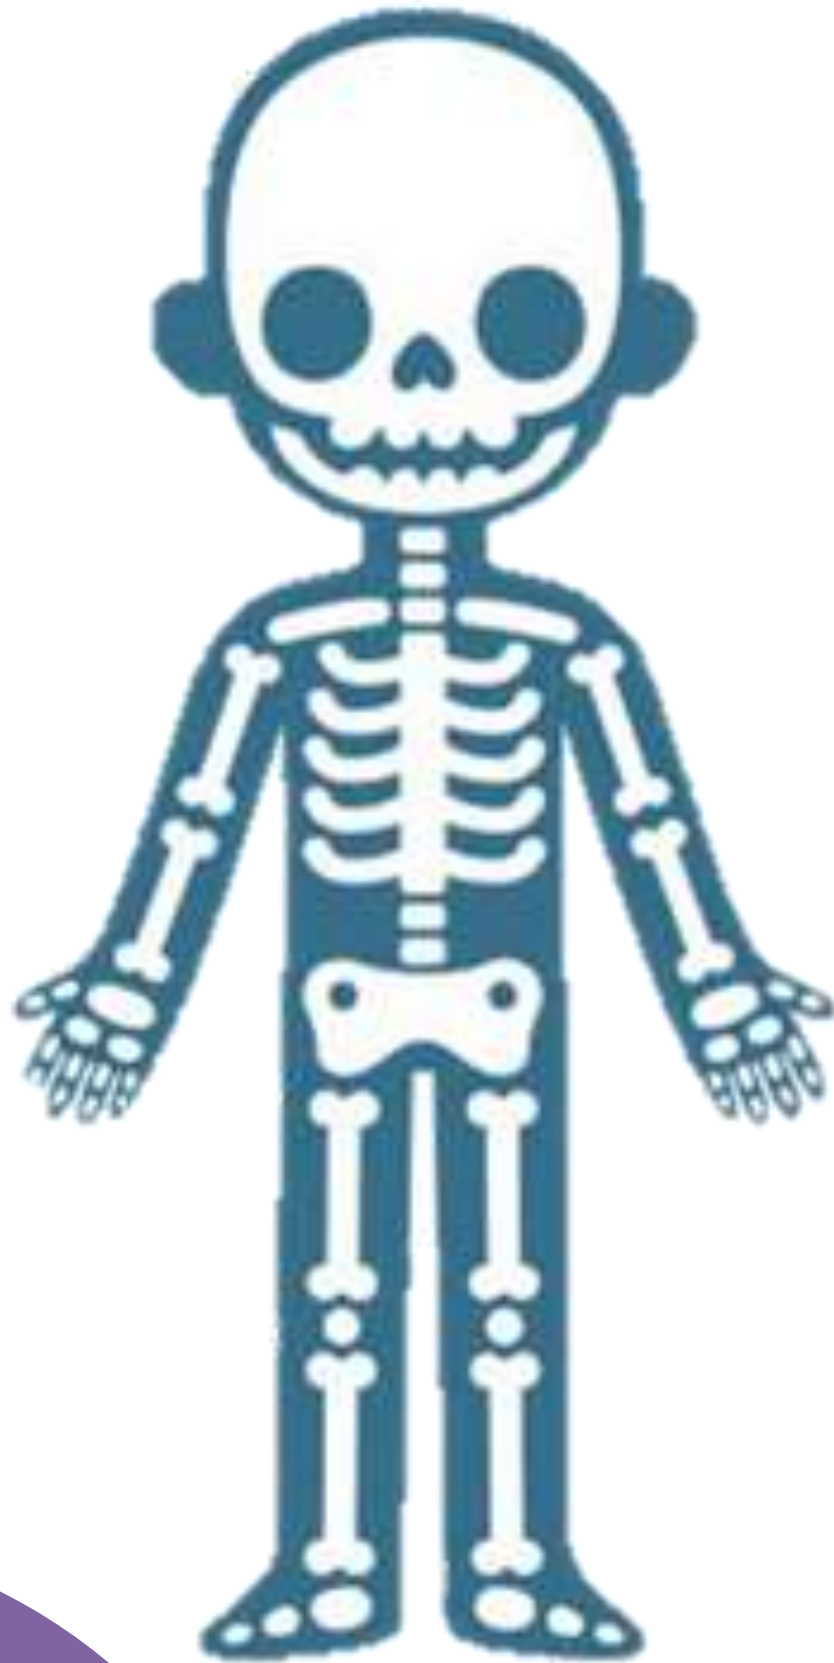

MUSCLES

- Contract (become shorter) and relax (become longer)
- Are soft and flexible

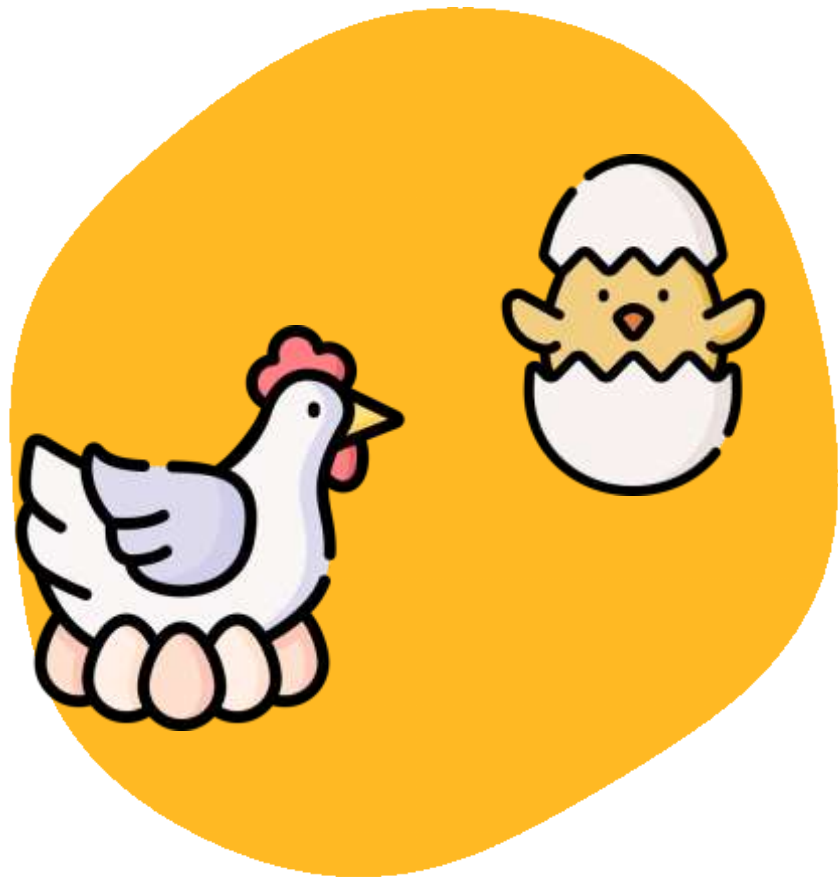

BONES

- They protect our organs
- They give shape to our body

REPRODUCTION

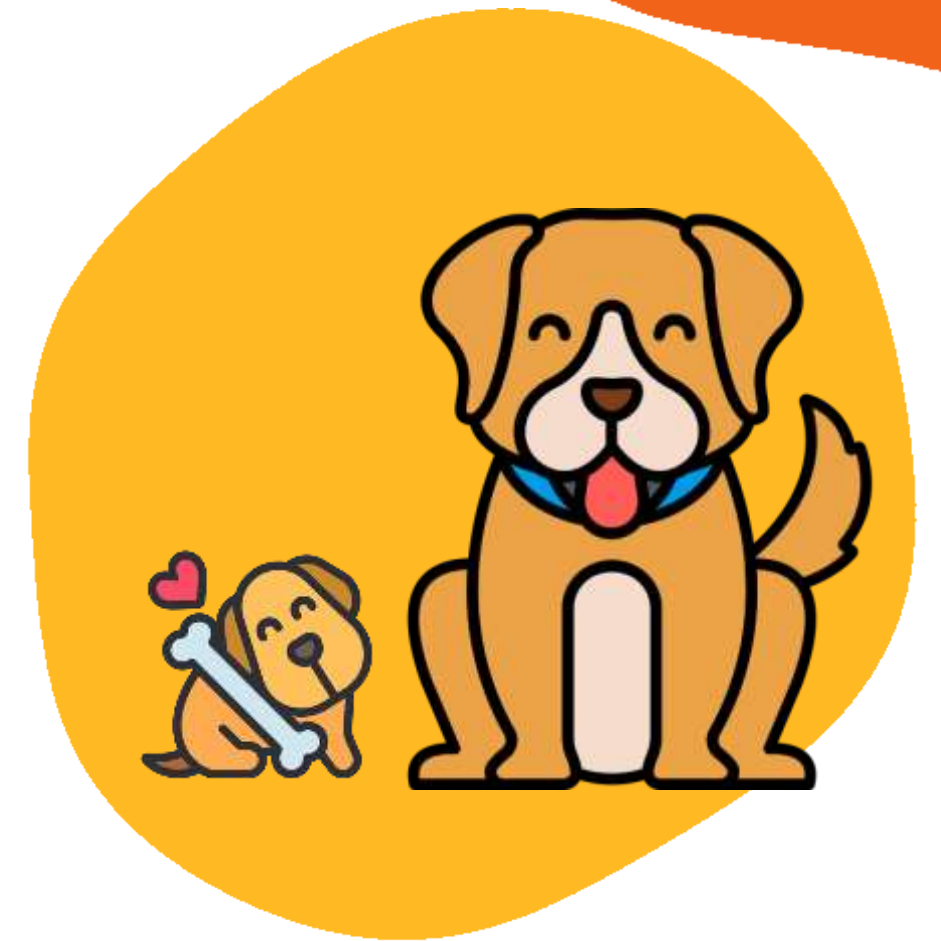

Chickens lay eggs
and have chicks.

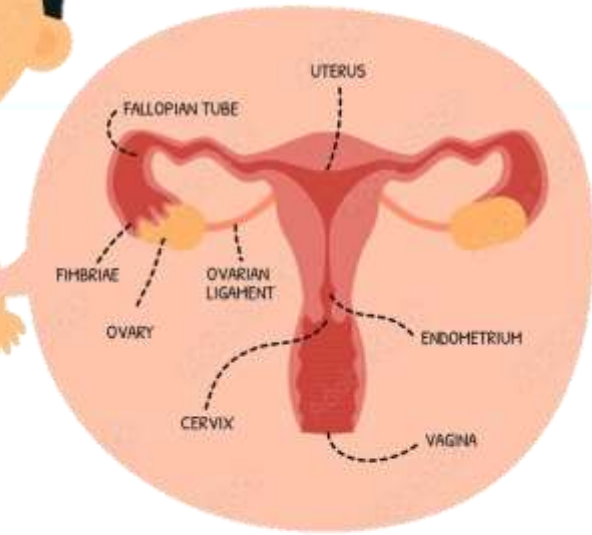

Living things can
make new living
things like them.

Humans have
babies.

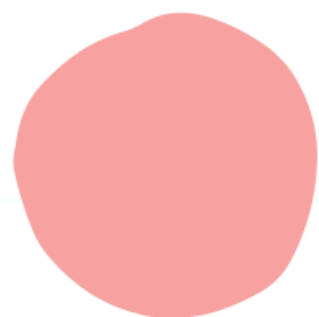

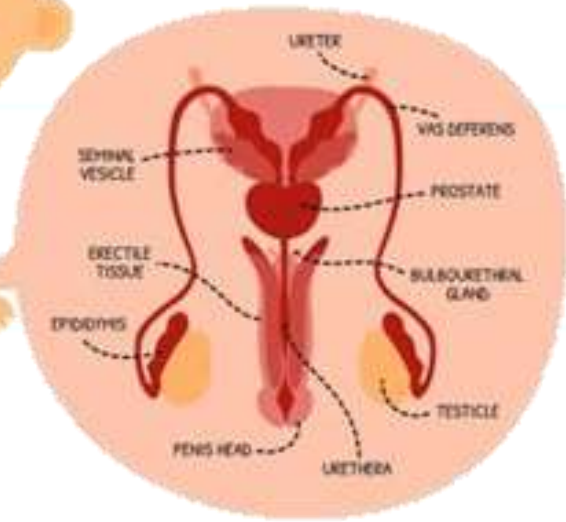

Dogs have puppies.

Reproductive System

Has male organs (testes, penis) or female organs (ovaries, womb, vagina)
